PRODUCT DESCRIPTION

LONG:

Wave Panels transform any space into a professional acoustic environment. Two foam layers of varying densities reduce both room echo and reverberation. Plus a concealed air pocket provides additional sound trapping. The result is all-round tonal balance for a superior broadcasting and listening experience. A hexagonal profile means Wave Panels can be configured to suit any space while proprietary EasyClick Frames make installation a breeze. Create multiple constellations, design unique shapes, and switch out colors on the fly. With Wave Panels, it's easier than ever to fine-tune your space for that superior sound and feel.

MEDIUM:

Wave Panels transform any space into a professional acoustic environment. Two foam layers of varying densities reduce both room echo and reverberation. A hexagonal profile means Wave Panels can be configured to suit any space while proprietary EasyClick Frames make installation a breeze.

SHORT:

With dual density foam construction, proprietary EasyClick Frames and a modular design, Wave Panels transform any space into a professional acoustic environment.

WAVE PANELS
